The Board Portal for Smarter Meetings and Good Governance

Convene lets boards lead with best digital practices through secure and powerful features.

Intuitive Platform

Convene's intuitive design makes it easy to use even for those who are not tech savvy. It works on any Windows, MacOS, Android, or iOS devices.

Enhanced Security

With high-level encryption, ISO-Certified hosting, comprehensive security policies, and audit trails, Convene eases your worries about security risks.

System Ownership

Convene lets you have control of your entire system – from settings, user management, and document access permissions.

Local and 24/7 Support

Our Customer Success team can be reached 24/7/365 via call, email, and live chat. Your queries can be resolved in as fast as a few minutes. Our local team in Hong Kong can help you onsite for any onsite assistance needed.

Local Hosting

Convene offers local hosting with primary and backup data storage within Hong Kong.

Trusted by Stock Exchanges, Listed Companies, BFSI and Governments in over 100 Countries.

Our Clients' Success Stories

When Convene was reviewed with our infoSec team, I remember them being happy and impressed by the security standards and certifications. Convene also has the necessary security compliance standards and that was a prerequisite for us because of the people who use it and the sensitive nature of the information discussed.

- Tesco

It's easy integration as all we needed was just having a tablet with the software installed and creating the accounts for users. After which, the users can access the meeting materials at their own convenience.

- Singapore Island Country Club

Accolades, Integrations, Affiliates and Partners

Let's Get Started

Get in touch today and see why top organisations in Asia and Hong Kong trust Convene.

Your Digital ESG Software to Future-Proof Your Reporting

Supercharge your reporting with an ESG Digital Software. Digitalise your data collection process, oversee performance with Disclosure Dashboards, Peer Benchmarking, and Goal Setting features, and be able to manage your narratives to create compelling stories and a compliant Sustainability Report that can adapt to the ever-changing ESG requirements.

Reporting has never been easier with a digital platform.

Go digital from start to end

Easily plug in your data once in a single central location and you're free to use and repurpose the same set of data for multiple types of reporting all in one platform. Import of data won't be a problem either, since we'll do the uploading for you.

Export a readily available SR, customise further if you like

A templated Sustainability Report is available for download based on Best-Practice Recommendations from our Team of Experts. Custom-design your reporting template further if you want to add in more metrics & other frameworks, and incorporate your own branding.

HKEX

Address demanding and evolving requirements

Generate a report that will evolve with HKEX requirements so you will never have to worry about compliance. Your quantitative and qualitative narratives can easily adapt to changes as you get provision updates and guidance from within the platform.

Your Board needs to be powered with an ESG Platform.

Maintain oversight and drive strategy

Data being in one space means better governance and oversight of goals, data collection workflows, and benchmarking, among others. This prevents greenwashing and effectively enables the board to prepare for future mandatory internal reviews.

Traceable record of all data

Data is rendered unreliable when there is no tangible source or accountable authority. Monitor and access a clear and consolidated record of all ESG data and updates in one platform, allowing for ownership, easier tracking and auditing.

One secure and resilient data hub

With data continuing to pile up every year, postponing digital data storage only makes reporting more inefficient in the long run. Store years of data in a secure and organised digital repository, with primary and backup data stored in AWS Data Centre.

You'll have full ownership of your ESG data!

Accelerate your Sustainability Journey today!
