Sustainable Investment Consulting

We support our clients to navigate sustainable investment goals and to leverage the landscape of opportunities.

ESG Align

Our new cloud-based digital product is designed to help asset managers understand and navigate the rapidly changing ESG investment landscape. Created by our ESG and impact specialists, ESG Align uses interactive modules to simplify the complexities and contradictions around ESG regulation and terminology.

ESG Align launches with two products focused on climate-related risk: Compliance Check - Hong Kong, a regulatory tool to support Hong Kong SFC licensed fund managers, and Understanding Risk, a training module specifically designed to support investment professionals around the globe.

Contact esg.align@ogier.com to find out more.

SI Consulting is a dedicated consultancy at Ogier offering bespoke design, integration, management and reporting solutions to our clients.

We recognise there is no one-size-fits-all approach when it comes to SI and have built our practice to provide tailored advice according to our clients' needs across the SI lifecycle. We work across the spectrum of asset class and SI strategies facilitating institutional investors, multi-strategy asset managers, private equity funds, private debt and credit, venture funds, family offices and foundations.

Several global mega-trends are shaping SI today, including the climate crisis, evolving regulation, growing investor demand and increased awareness that accounting for ESG factors may lead to better risk-adjusted financial return in the long-run.

Evolving regulations are pressuring financial market participants to enhance their current operating models to refine, embrace, and embed ESG practices. Authorities around the world are moving ahead to require enhanced disclosure on ESG or sustainability factors of investment products and business activities to assist investment decision-making. We have witnessed this with the introduction of regulatory disclosure

requirements, for example, in the EU, UK, Hong Kong and Singapore.

Investor demand is also growing, driven by younger generations and high net worth individuals seeking to invest with their values. This is pushing asset managers to act and respond with sustainable investment solutions that match investors' risk, return and impact profile.

SI Consulting delivers flexible solutions to our clients no matter where you are on your sustainable investment journey. Whether you are starting out or enhancing your investment strategy to factor ESG risks and opportunities, our team can support you.

Our services include:

- Policy and strategy
- Regulatory compliance
- Training and education
- Portfolio integration
- Due diligence
- Measurement and management
- Reporting
- Independent verification

Leonie Kelly
Director and Head of Sustainable Investment Consulting,
Hong Kong

 I believe the very fact that ESG & Impact is gaining momentum in the legal realm is a sign of significant change for our industry and one which will bring a huge positive shift in the ESG & Impact economy.
